Dear Ms Popo

**ARM 61: Request to Reclassify a Product from POM to P - Domperidone 10mg tablets (Motilium 10)**

I refer to the MHRA's request for comments on consultation *ARM 61: Request to Reclassify a Product from POM to P - Domperidone 10mg tablets (Motilium 10)*.

The College has reviewed the documentation, and we do not have any concerns about the reclassification of Domperidone 10mg tablets (Motilium 10) from POM to P, provided it can be assured that pharmacists will strictly advise customers of the potential dangers of combination with CYP3A4 inhibitors such as oral ketoconazole and erythromycin.

Yours sincerely
