# Infectious Diseases

Friday 25 September 2026

09:25 – 17:00

Online

## What you'll learn:

- Current best practices in managing and controlling HIV, Hepatitis B, and Hepatitis C
- New perspectives on the microbiome and its growing impact on treatment strategies
- Innovative approaches to Tuberculosis care and evolving treatment pathways
- A deeper understanding of immunomodulation, and its role in modern infectious disease therapy.

Join us for an essential and engaging symposium - this event brings together the latest evidence, expert insights, and emerging innovations in the management and control of major global health challenges - including HIV, Hepatitis B & C and Tuberculosis.

All grades of medical, nursing, scientific staff, allied health professionals and medical students are welcome.

Register now to watch live or catch-up later – all talks available within 3 working days of the live event for 28 days.

**CPD +6**  
Credits

\*6 CPD credits applied for.
