Cardiology

Thursday 5 November 2026

08:55 – 17:00

Online

Highlights of the programme:

- Get up to speed with the latest guideline updates in pregnancy, valvular heart disease and dyslipidaemia
- Debate on managing coronary artery disease in severe left ventricular dysfunction
- Learn how heart failure management continues to evolve
- Explore difficult cases with expert – myocarditis and pericarditis

- Understand how AI is changing cardiology
- Discover emerging therapies and future directions
- Focus on care that truly benefits patients

Cardiology is evolving rapidly, with new guidelines, therapies and technologies continually changing how we diagnose and manage cardiovascular disease.

This symposium is aimed at all healthcare professionals involved in the care and treatment of cardiology patients including, acute and general physicians, cardiologists, specialist trainees, internal medicine trainees, nurses and those within the allied health professions.

Catchup is available to registered delegates. Full details on the website
