Acute Medicine: Sharper Skills, Smarter Systems - St Andrew's Day Symposium

Thursday 26 – Friday 27 November 2026

Join us in Edinburgh or online for our flagship St Andrew's Day Acute Medicine symposium.

Hear from nationally and internationally recognised experts, with practical updates and fresh perspectives on the topics shaping acute medicine, including:

- **Updates on common conditions:** AI in healthcare and the Future of GLP-1 therapies.
- **The modern patient journey:** including Hospital at Home, virtual wards, same day emergency care and AI-enabled services.
- **Parallel sessions:** diabetes technology, apps and software, leadership, front door teaching, ultrasound and cardiac wearables.
- **Clinical updates:** Functional disorders, POTS, headaches, Lyme disease, delirium and CNS infections.
- **Expert insights:** Challenging cases and practical approaches to pulmonary embolus, cardiorenal syndrome and liver failure.

Feedback from our previous **St. Andrew's Day** Conference:

“Amazing event. Very well curated...felt like we were learning from the consultant's experience and practical application of medicine rather than bookish knowledge.”

“Friendly, welcoming, diverse topics, well chaired, diverse speakers...great food.”

“A great variety of topics with excellent presentations... good take home points that I shall implement in my practice.”

“New perspectives on important topics, delivered by knowledgeable and enthusiastic colleagues.”
