Creating a PACES Trainee Examiner Pack

1. Collate a pack of 5 copies of each mark sheet (40 mark sheets)

2. Photocopy each mark sheet using the option that will produce them in the following order

   - 5 x Respiratory (Station 1)
   - 5 x Abdominal (Station 1)
   - 5 x History (Station 2)
   - 5 x Cardiovascular (Station 3)
   - 5 x CNS (Station 3)
   - 5 x Communication (Station 4)
   - 5 x Brief Clinical Consultation One (Station 5)
   - 5 x Brief Clinical Consultation Two (Station 5)

3. Photocopy:

   - Trainee Examiners Guide (TE1)
   - Trainee Examiner Assessment form (TE2)
   - Trainee Examiner Feedback form (TE3)

4. Create a wallet which contains all the above (Examiner guide and assessment forms on top)
The PACES (Practical Assessment of Clinical Examination Skills) format to the MRCP(UK) Part 2 Clinical Examination was introduced in 2001. It aimed to standardise the assessment of candidates and improve the reliability of the examination. It is important that examiners are trained in order to achieve that consistency and reliability.

The training of new examiners will comprise:

**Preparation before attending PACES**

In the days prior to attending the clinical examination, the trainee examiner should:

- Read/re-read the latest version of the Examiner’s Guide. This should be sent by the College Examination Department and can be downloaded from the MRCP(UK) website (www.mrcpuk.org). The latter is updated continually and should be reviewed by examiners prior to each diet in which they participate.
- View/re-view the PACES Video - [http://www.youtube.com/user/MRCPUKonline](http://www.youtube.com/user/MRCPUKonline).

**Attend PACES as Trainee Examiner**

New examiners must attend three cycles of PACES. The Trainee should arrive in good time and introduce him/herself to the Host and Chair of Examiners.

---

**Essential Components of Training**

- Attend the briefing by the Chair of Examiners
- **Cycle 1:** Calibrate and “shadow-mark” 5 candidates at Station 1 or 3
- **Cycle 2:** Discuss marking and “shadow-mark” 5 candidates at Station 4 (or Station 2)
- **Cycle 3:** Calibrate and “shadow-mark” 5 candidates at Station 5

The Chair of Examiners should agree the training plan at the start of the day and complete the Trainee Examiner Assessment form (TE2) (attached or download from [www.mrcpuk.org](http://www.mrcpuk.org)) to this document at the end of the day. This form and the shadow mark sheets must be returned to the College.
Trainee examiners must attend the briefing given by the Chair of Examiners before the examination starts. Thereafter, the Trainee should take part as follows:

- **Cycle One (essential)**
  - The Trainee should join either Station One or Station Three for the first cycle of 5 candidates. The Trainee must become familiar with the cases along with the examiners at that station before the cycle begins and ensure the introductory statements are appropriate. The Trainee should take part in the examiners’ discussion to agree the physical signs, the questions that might be posed to the candidate, and the schedule of marking that will lead to the award of Satisfactory or Unsatisfactory performance at each skill.
  - The Trainee will be introduced to each candidate as a Trainee Examiner and will observe the conduct of the examination without playing an active part in the questioning. The Trainee should “shadow mark” the candidate, justifying the award of Unsatisfactory or Borderline with comments that would allow feedback to the candidate. Comments should also be written when a candidate is awarded Satisfactory – the co-examiners might have come to different judgements.
  - The “shadow marks” and appropriate comments to justify the mark and give feedback to the candidate should be entered on the mark sheets without conferring with the examiners. However, after the mark sheets have been collected, the marks awarded and the comments should be discussed between examiners and Trainee in the interval before the next candidate starts.
  - Shadow Mark Sheets are not pre-completed by candidates and the candidates name and examination number as well as the Trainee Examiner’s name should be entered and a brief description of the case given. The shadow mark sheets will be collected at the end of the examining day and returned to the College Examination Office along with your Trainee Examiner Assessment Form (TE2).

- **Cycle Two (essential)**
  - The trainee should join a “talking” station – either Station Two or Station Four. The Trainee will not be able to participate fully in discussion and rehearsal of the patient/surrogate before the first cycle begins as they will be at Station 1 or 3. However in the break between the cycles they should familiarise themselves with the agreed marking schedule and the proposed questions to be asked.
  - Again, the Trainee will be introduced to each candidate as a Trainee Examiner. The conduct of the examination should be observed without playing an active part. The candidate should be “shadow marked”, ensuring candidate name and number have been added, noting the scenario number and giving a brief description of it, and providing comments to justify the marks awarded (as at Cycle 1). The shadow mark sheets will be collected after the examination, and returned to the College Examination Office.

- **Cycle Three (essential)**
  - The trainee should join the examiners at Station 5, participate in the calibration, observe the candidate: patient interactions and shadow mark five candidates. The shadow mark sheets will be collected after the examination, and returned to the College Examination Office.
• **Post-cycle discussion (essential)**
  - The Chair of Examiners will lead a short discussion of the marks after each of the cycles. The Trainee should attend this important session where marks are reviewed, discrepancies between examiner pairs are discussed, and any errors in mark sheets are identified. Candidates whose performance merits counselling are identified at these post-cycle discussions. Any procedural irregularities or problems running the cycle are identified at each post-cycle discussion and are forwarded through the relevant College Examination Office to the Clinical Examining Board. Candidates who were thought to be rough with the patient will be discussed in detail.

At the end of the day, the Trainee Examiner should discuss the experience with the Chair of Examiners. The Chair will seek feedback from the examiners with whom the Trainee was attached, review the mark sheets, and the aptitude for examining. The Trainee should let the Chair know whether he/she feels confident to examine independently.

The Trainee must ensure that the Host Examiner has the following papers to return to the College:

- **Trainee Examiner Assessment Form (TE2, attached to this document or download from [www.mrcpuk.org](http://www.mrcpuk.org))** - completed fully, signed by the Trainee and by the Chair of Examiners or the Host Examiner at the centre at which the training took place.
- **The shadow mark sheets for Station 1 or 3, for Station 2 or 4 and for Station 5.**

The Examination Office at the College through which the training was arranged will notify the Trainee whether he/she can proceed to examine independently following the day as a Trainee.

Trainee examiners are encouraged to comment on the training experience and a Trainee Examiner Feedback Form (TE3) is also attached, or can be downloaded from [www.mrcpuk.org](http://www.mrcpuk.org). It should be returned to the College which organized the training – either through the Host examiner with the other training documents or independently.
Trainee Examiners Name: ____________________________________________________________

Trained at: .....................................................................................................................

Centre No.: __________________________________ College: Edin / Glasg / Lond: __________

Date: ............................................................................................................................

Confirm completion of the following training requirements:

Reviewed Examination Regulations: YES / NO

Reviewed PACES Video/DVD: YES / NO

Attended Examiner Briefing by Chair of Examiners: YES / NO

Shadow-marked Station One or Station Three: YES / NO

Shadow-marked Station Two or Station Four: YES / NO

Shadow-marked Station Five: YES / NO

Attended each Post-Cycle Discussion: YES / NO

Has equal opportunities training been undertaken within the NHS or elsewhere: YES / NO

Does Trainee Examiner feel confident to examine independently? YES / NO

Comments from Host Examiner/Chair of Examiners

______________________________________________________________________________

Does the candidate display competence, appropriate attitudes and aptitude for
examining independently in PACES? (Host or Chair to respond) YES / NO

Signature of Trainee Examiner: ......................................................................................

Signature and number of Host/Chair of Examiners: ....................................................
MRCP(UK) PACES Examination

Trainee Examiner Feedback Form – TE3

Trainee Examiners Name: ........................................................................................................

Exam Centre: ...........................................................................................................................

Date: ......................................................................................................................................

Chair of Examiners’ Name: ......................................................................................................

Stations Observed (Please circle): 1 2 3 4 5

Do you feel you were adequately prepared for today? YES / NO

Any Comments

Was the day informative? YES / NO

Any Comments

Do you feel ready to examine in PACES? YES / NO

Any Comments

If we can improve either the way we train examiners or how the PACES exam is run, please add your comments below:
